

DEAR FAMILIES,

This is a take-home activity as part of the Lysol® HERE for Healthy Schools program. Together with your child, scan the QR code to watch a video lesson about how our immune system helps us to fight bad microbes!

As a family, punch out the finger puppets together, put them around your fingers, and play thumb war, puppet show, and more.

Scan the QR code to watch the video lesson, a how-to video for your finger puppets, and play ideas.

Draw your own microbes on the blank finger puppets!

When used as directed, Lysol® Disinfecting Wipes and Lysol® Disinfectant Spray kill 99.9% of viruses and bacteria, including cold and flu and the COVID-19 virus, and can be used on many household and classroom surfaces like desktops, door handles, and countertops.

MINILABS

ACTIVITY INSTRUCTIONS:

Step 1 Punch out the finger puppets from this sheet.

Step 2 Curve the tabs of the puppet towards each other until they overlap.

Step 3 Use some tape to secure the tabs in place, creating a hole where your finger can fit through.

Step 4 Put the puppet around your finger and play!
