

Classroom Spinner Activity

Supplement

MINILABS

Dear Teacher,

- 1 Please cut out the poster slices and give each group of students one or more slices, depending on the size of your class.
- 2 Students will write or draw one cleaning task on each slice.
- 3 Collect all slices, and as a class decide which 6 you want to add to your classroom spinner.
- 4 Add velcro dots, tape, or glue to the back of selected slices and add them to your classroom spinner. Tape or glue down the sides of the slices so they stay flat.
- 5 Cut the rectangular piece, roll it into a column, and glue/tape the end. Place it over the bottom part of the Chicago screw, add the spinning arrow on top, and secure the top screw so you get a spacer under your arrow.
- 6 Have students form cleaning groups, spin the arrow, divide tasks, and get your classroom cleaned!
